- ✓ Bin too small? Pick up a sticker and place in on you own container.

Stickers and Fees

- ✓ Appliance and electronic stickers
- ✓ Compost area stickers
- ✓ Trash fee reduction for seniors

Randolph Recycling Report

In 1 Year Randolph residents recovered about **1600** tons of recycling. **400** tons of containers & **1200** tons of paper and cardboard.

Energy:

3% of America's energy is used for producing packaging (PA DEP)

One pound of recycled steel saves 5,450 BTU's of energy or 26 hours of a 60-watt bulb (PA DEP)

Recycling:

Recycled glass can be used to make new glass bottles and jars, insulation, and construction materials, such as road aggregate.

Recycled glass is also turned into glass pebbles for fish bowls and vases. Artisans are using recycled glass for everything from jewelry to stained glass vases. The possible uses for recycled glass are nearly endless.

One recycled can saves enough electricity to light a 100-watt bulb for 3.5 hours (PA DEP). Using recycled aluminum saves 80% of the total energy consumed when aluminum is produced from scratch (Thoreau Center for Sustainability). Americans throw away enough paper every year to build a 12 foot high wall from Los Angeles to New York (Environmental Defense).

Composting:

One person creates 360 pounds of food and yard waste per year. Instead of going to a landfill, this waste can be transformed into rich fertilizer in your own backyard. Composting uses natural processes to encourage the rapid decomposition of yard clippings, leaves, and food. Compost can be mixed into soil or put around plants to add more organic material and nutrients to help them grow.
